

FEAR LAB

ELECTRONIC PRESS KIT 2025

ABOUT US

With their new EP "ALIEN", Fear Lab reveals an even harder and darker side than before. The band, known for honest and personal music since its formation in 2015, now presents a powerful evolution of its sound. Influenced by genres such as Metalcore and Nu Metal, and shaped by their time on stage together, Fear Lab's "ALIEN" is even more profound and emotional. Despite this evolution, the band's unique style mix, which has made them famous in the scene, remains intact.

The release of their debut EP "Ready To Fall" in 2023 opened doors to numerous concerts, even internationally. Fear Lab opened various shows as the support band for "Null Positiv" on their German tour, simultaneously establishing themselves in the Swiss metal scene. In Summer 2024, the band toured Switzerland as co-headliners with the Nu-Metal band "Eversis" and concluded the successful tour with two shows in Poland.
